ACADEMIC PROJECTS

WEATHER FORECASTING

Weather forecasting is the prediction of the state of the atmosphere for a given location using the application of science and technology. This includes temperature, rain, cloudiness, wind speed, and humidity. Weather warnings are a special kind of short-range forecast carried out for the protection of human life. Weather warnings are issued by the governments throughout the world for all kinds of threatening weather events including tropical storms and tropical cyclones depending upon the location**.**

EMPLOYEE MANAGEMENT SYSTEM
"Employee Management System" is a distributed application, developed to maintain the details of employees working in any organization. It maintains the information about the personal details of their employees. It is user friendly and just asks the user to follow step by step operations by giving him few options. It is fast and can perform many operations of a company.
